ESCO PARTNERS

The first fully capitalized ESCO (Energy Service Company) in Greece!

We design, construct, maintain and manage energy saving and energy upgrade projects for buildings and applications with **full coverage of the initial capital** of the project (CapEx) and we offer services such as maintenance, monitoring, energy optimization, insurance and asset management of the installation.

- Photovoltaics
- HVAC
- Power Quality
- Combined Heat Power
- BESS
- LED Lighting

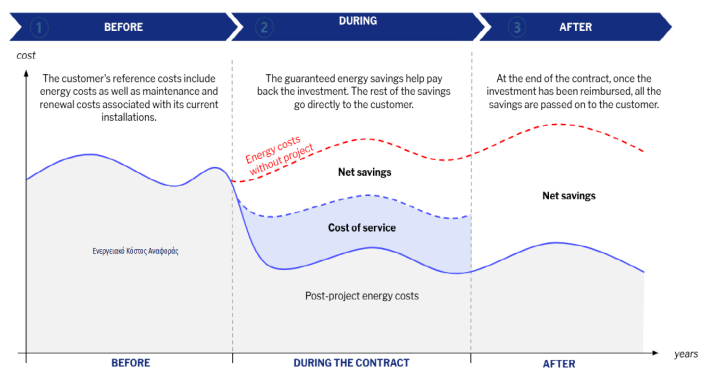

Energy Upgrade Solutions :

- Photovoltaic Systems
- Heating-Ventilation-Air Conditioning
- Commercial & Industrial Refrigeration
- Power Quality
- Battery Energy Storage Systems
- Heat Recovery
- Steam

Benefits of ESCO model:

- ⇒ Saving Energy and Money
- ⇒ Clean electricity from RES
- ⇒ Energy and CO2 footprint reduction
- ⇒ Energy Security and Autonomy
- ⇒ Freeing up client resources (start-up capital, time, people)
- ⇒ Tool for ESG and Sustainability goals
- ⇒ Risk-free
- ⇒ Turn-key solution
- ⇒ Increased customer's profitability
- ⇒ Green Transition

Reference ESCO Projects :

- ◆ Clean Energy from PV at ADAM PACK factory 462KWp
- ◆ Clean Energy from PV at AMERICAN COLLEGE OF GREECE 498KWp
- ◆ Clean Energy from PV and storage at WASTE TREATMENT UNIT OF ALEXANDROUPOLIS 700KWp + 200KWh storage
- ◆ Clean Energy from PV at CORINTH PIPEWORKS factory (VIOCHALKO group) 7.100 KWp
The largest PV on industrial roof in Greece!

Total Installed Capacity 9MW all with Energy Performance Contracts

About us:

ESCO PARTNERS is the **first fully capitalized ESCO** (Energy Service Company) in **Greece**, established by Sirec Energy S.A., manager of the first energy fund (EuSIF) in Greece and the technical company MES Energy S.A. with extensive experience and expertise in energy projects.

The scope of ESCO PARTNERS is the provision of energy services for upgrading buildings and applications with the Energy as a Service and ESCO model in sectors such as Photovoltaics, Battery Energy Storage Systems, Heating, Air Conditioning, Ventilation, Refrigeration systems, Lighting, Power Quality, Heat Recovery, Cogeneration of Heat and Power, Steam production, Electric Charging and others.
